WANT AN INSPECTOR

UN SOUND FRUIT SOLD
IN PORTLAND MARKETS.

Commission Men All Favor a State Fruit Inspector—Complain That the Culls From Hood River Are Sent to Portland Markets—If There Were Rigid Inspection Growers Would Be More Careful About Producing Bad Apples.

A recent statement of A. J. Mason, of the Hood River Apple Growers' Union, is much criticized by local commission men as well as by the retail trade. Mr. Mason told about the wormy apples being served at the leading hotels and, according to the commission men, intimated that the latter were to blame, says the Oregon Daily Journal.

"This talk by Mr. Mason is 'all rot,'" says W. B. Glafke, president of the Produce Merchants' Association. "Who is to blame for the 'cull' and wormy apples that come to this market? Where do they serve better apples at the hotels in this state than they do right here in Portland? What do they serve at the leading Hood River hotels during the strawberry picking season, as well as other times?"

"Prunes," said Mr. Glafke, answering his last question. "Prunes are what they serve in the best apple-growing section of the country. When not serving prunes, what do they serve? The 'culled' apples that you can find. This talk about the growers there not wanting to send that sort of apples here makes me tired. Give us a fruit inspector, and we will remedy this matter."

"I was in Hood River several weeks ago," said Mr. Levy of Levy & Spiegel. "What did they serve me there in the way of apples? 'Culls'—yes, nothing but culls. Yes, give us a fruit inspector; we commission men are certainly willing to have one."

"My attention has just been drawn to this matter," said Fred Page, of Page & Son, large handlers of apples. "Does Hood River ship her best apples to this market? Very few. The best apples are sent to the east and to Europe, and what we get is what the others won't use."

"I am firmly in favor of a fruit inspector. The appointment of such an officer would be a great help to the entire fruit industry, and all commission men favor the idea."

"Here are some of those much talked of Hood River apples," said George Davenport of Davenport Bros., extensive handlers of apples. "Here they are. We are trying our best to get rid of them at 40 cents a box, and can't move them. Yes, you can see for yourself they're from Hood River, too. I have been telling my shippers for some time not to send their 'culls' into this market, as we can't handle them. They continue to come, however, and we must move them. We are getting much better apples now from the Willamette valley than from Hood River. The best fruit from the last named place goes to other points, where they have fruit inspectors, and what they can't sell to the outside they ship to Portland. Put me down as firmly in favor of a fruit inspector."

FRENCHMEN COME WEST.

Over 25,000 Canadians Will Work on New Trunk Line to the Pacific. A special to the Oregon Daily Journal, from Vancouver, B. C., says: Fully 25,000 French have either left or are about to leave their native land for this part of Canada, being attracted by the promise of work at good wages on construction of the Grand Trunk Pacific, and at the same time being at odds with the government of France over treatment of Roman Catholics.

Preliminary negotiations have been conducted through the Vatican. A. Fox, an enterprising merchant of Montreal, acting in behalf of the immigration department of the Canadian government. He is now here, and says that the first colonists, 12,000 strong, are ready to sail for Canada. He says most of the newcomers are agriculturists or vineyardists. The latter are negotiating for a tract of 50,000 acres in the Okanagan district, where their families will be at once established, the men intending to work on the railway during construction, and then settle down to grape culture and wine making. The others will be distributed through the agricultural districts of the Crow's Nest Pass.

THE COSTLIEST RAILWAY.

New York's Subway Marks the Acme of High-Priced Construction. The most expensive railroad in the world, is the New York subway. A writer in Leslie's Weekly, commenting upon the cost of this road, says: "When it is entirely in operation this road will be about 20 miles in length. Its cost will be \$40,000,000. That is \$2,000,000 per mile. About eight miles are now in operation. The fare is five cents. When the remaining sections shall be opened the fare will be the same. The city of New York has paid the

cost of construction, and the \$40,000,000, with interest, year by year, must be repaid by the operating company. Nickel fares must do this. If the cost were represented by the five-cent coins placed edge to edge, there would be a line more than 150 miles long.

We already know that the cost of construction will be \$40,000,000. Equipment will add \$25,000,000 to this. The steel beams and girders in place weigh 124,000,000 pounds. There was excavated 3,250,000 cubic yards of material. As many as 10,000 men have been employed on the work at one time, and the road will give permanent employment to 1000 persons. During the construction there were fatal accidents which cost 50 lives."

RUSSIAN BOY SCOUT

RECORD BREAKER FOR NERVE AND ACTIVITY.

Thirteen-Year-Old Lad Has Schemed His Way Through the Japanese Lines and Into Port Arthur Four Times—Has Also Done Spy Work, and Passed Japanese Troops Eleven Times On One Scouting Trip—Was Once Captured as a Spy and Was Spared Because of His Youth.

St. Petersburg, Nov. 28.—After Gen. Stoessel, Nikolai Suseff, aged 13, is the hero of Port Arthur. According to the Russian press, Suseff has pierced the Japanese lines, carrying dispatches to Kuropatkin, no less than four times.

Suseff is a lad of good education, the son of an engineer, and grandson of an English woman named Graves. During his third return journey he was captured by the Japanese, who spared him a spy's death owing to his youth. On the night following his capture he shot his guard, mounted upon a cavalry horse, and made a dash for freedom. At 3 in the morning he rode up to the outworks at Pilehwan with a Jap bullet through his shoulder.

Suseff's method of escaping capture was to hide himself by day, and crawl through the investing lines by night. His first exploit was to walk from Port Arthur to Tashichiao, then in Russian hands, passing Japanese troops no less than 11 times. On another occasion he acted as spy, penetrating the Japanese lines, and bringing back the breech-lock of a gun as proof that he had done so. Kuropatkin has decorated the boy despatch rider with the Order of St. George; and General Stoessel has specially reported his service to the czar.

Disastrous Wrecks.

Carelessness is responsible for many a railway wreck and the same causes are making human wrecks of sufferers from throat and lung troubles. But since the advent of Dr. King's New Discovery for consumption, coughs and colds, even the worst cases can be cured, and hopeless resignation is no longer necessary. Mrs. Lois Cragg of Dorchester, Mass., is one of many whose life was saved by Dr. King's New Discovery. This great remedy is guaranteed for all throat and lung diseases by Tallman & Co., druggists. Price 50c and \$1. Trial bottles free.

In Memory of Martyrs.

Dublin, Nov. 28.—At Skibbereen, in County Cork, there was unveiled today a monument in memory of the Manchester Martyrs Allen, Larkin and O'Brien, who killed a policeman in the rescue of two Fenian leaders from the Manchester jail, and were subsequently executed. The unveiling was accompanied by interesting ceremonies and was attended by an immense crowd of Nationalists and representatives of patriotic organizations throughout Ireland. The principal address of the day was delivered by O'Donovan Rossa, the former Fenian leader, who came from New York especially to attend the unveiling.

Pure Food in Idaho.

Leviathan, Idaho, Nov. 28.—State Pure Food Commissioner A. McPherson, who left here Tuesday morning, took with him samples of bulk oysters, lard and catsup which he believes do not conform with the pure food law. The commissioner suspects the oysters of having maldyde, while the lard is thought to be adulterated with beef and mutton fats. Mr. McPherson has framed his annual report, which is to be published in pamphlet form and will show all the arrests made by him during the last year with comments on the various kinds of adulterations discovered.

Guilty of Less Majesty at 13.

Berlin, Nov. 28.—An extraordinary case of less majesty has occurred in the town of Liass, in Posen. A little boy of 13, Adelbert Grzabka, it is solemnly related, was in the habit of consorting with other boys on the street and discussing with them the Polish insurrection of 1863 and the present Russo-Japanese war. Grzabka was of the opinion that Germany has not observed strict neutrality, and dragging the Kaiser's name into his impeachment of German policy, he stamped with both his feet. For this he has been sent to prison for three months.

Ames on Trial Again.

Minneapolis, Minn., Nov. 28.—Former Mayor A. A. Ames was placed on trial today on a charge of receiving a bribe from Beattie Lee. This is the fifth trial to which the much-indicted ex-mayor has been subjected. The former trials resulted in disagreements of the juries, and if another disagreement results it appears probable that another trial will be ordered. It is believed to be the determination of the judges of the district court to make a jury decide whether or not the former mayor is guilty or innocent.

SINCE 1776

NOTED PHYSICIANS OF EUROPE
HAVE PRESCRIBED COD
LIVER OIL.

As the Greatest Curative Agent and
Strength Creator Known to
Medicine.

But they have also admitted that owing to the vile, nauseating grease which it contained, and which has no curative value whatever, it was impossible for patients to take into their systems enough to obtain the best results.

Therefore, the discovery of two French chemists how to get the benefit of the valuable curative elements of the Cod Liver without the oil, was hailed with delight by physicians the world over. These Frenchmen found that the medicinal curatives could be separated from the grease and oil, and produced in a concentrated form delicious to the taste and acceptable to the weakest stomach. Thus was created Vinol, which is sold by our local druggists, the Brock & McComas Co., on a positive guarantee to return money whenever it fails to do all they claim for it.

The Brock & McComas Co. say that in Vinol they offer the people of Pendleton a cod liver oil medicine acknowledged by physicians everywhere as the greatest curative agent and strength creator known to medicine, and they have never sold anything in their store equal to Vinol to build up and strengthen old people, weak women and children, and people who are run down, tired, nervous and debilitated.

The Brock & McComas Co. also guarantee that Vinol will strengthen the digestive organs, make rich, red blood, cure chronic colds, coughs and bronchial troubles, and restore the system to a healthy, robust condition quicker than any other medicine.

Vinol is not a patent medicine, and you know what you are taking, simply a delicious cod liver oil preparation with everything which it contains printed on the bottle. Try Vinol on our guarantee to return money if it fails. Brock & McComas Co., druggists.

A New Industry

CLOTHING MAKING ADDED TO THE LIST OF PENDLETON'S INDUSTRIES.

Since the change in the management of the Pendleton Woolen Mills, which occurred on September 1st, last, a garment department has been added, and now Smoking Jackets, Bath Robes, Lounging Robes, Shirts, Bathing Shirts, Arctic Blouses and Toggan Coats, are being manufactured.

These garments already give evidence of soon being as popular as the famous Blankets, Robes and Shawls made by this institution.

But few samples have been shown, but so great has been the call for these garments that they have been behind on orders ever since commencing to manufacture them, in spite of the fact that they have made new additions to the machinery to turn them out.

The Pendleton merchants have been showing the Smoking Jackets for about two weeks and now samples of their Bath Robes are on display and are even prettier than one would imagine.

They are made out of the same high-grade cloth that goes into the Indian Robes, and one of these Bath Robes, if worn every evening for the ordinary lifetime, would still be serviceable, for they are practically a garment that will not wear out.

In contemplating the purchase of a Smoking Jacket or Bath Robe but few people consider that a cheap article will always look cheap and wear but poor service. The Pendleton Bath Robes and Smoking Jackets, while higher in first cost, will give the wearer longer service, more comfort and better satisfaction than a cheap article.

They are a distinct novelty and for Christmas or holiday presents will not fail to please, no matter how fastidious or particular the recipient may be. In making up Christmas lists remember the Pendleton garments.

TRAINING SCHOOL FOR HORSES

Wanted—One hundred head of unbroken horses. I am located for the winter at the Dutch Henry feed yard, corner of Alta and Lillith streets, where I conduct a first-class training and sale stable. If you want to buy a horse I will take your order and select the best horse for you, or if you have a horse to sell I am well acquainted with the best buyers. I am well equipped to break and handle any horse from the finest blooded stock to the wildest and most desperate broncho. There is no horse but can be broke and be made to drive or work nicely if he be handled correctly. I have broke one hundred and twenty-three head in Pendleton, some of which had become desperadoes. I guarantee satisfaction in every case.

Lee Kennard
